

Catalogue of the Madreporarian Corals in the British Museum Volume 4

By British Museum Dept of Zoology

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .rises into short, thick, angular, rather flat-topped columns, slowly increasing in thickness as they rise, and with smooth flattened sides. The living layer descends to various depths, from 5-6 cm., sometimes even reaching 9 cm. The calicles on the flattened, slightly convex and irregularly wavy top (fig. 2), are all of the same pattern, some 3 mm. across, 2-3 mm. deep, conical, crowded, but all as if breaking through an extremely friable, ragged, laminate reticulum. The walls are thin and membranous, very porous, with large openings, and, consequently, frequently incomplete at the edges; they are hardly conspicuous enough to show any definite zigzag or straight course of their own. The laminate septa form the chief element in the walls, and are so incised and porous as to appear quite ragged, while the obscuration of their radial symmetry adds to this effect. They begin to project in...

Reviews

Very beneficial to all of class of people. I am quite late in start reading this one, but better then never. You may like just how the writer create this publication.

-- **Audra Klocko PhD**

Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.
