

Report Volume 48

By United States Dept Agriculture

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 edition. Excerpt: .the height of 300 feet the dew is too light to produce either rot in the berry of the grapevine or mildew on its leaves. Hence we understand why the thermal zone is both warm and dry. I will not venture to say that the grape will never rot within the limits of that zone, but I can say that the Catawba grape is altogether unreliable when planted in our low valleys, but where the vines are growing on the slopes of the mountains they have not failed to ripen their fruit for more than 30 years, whether the season was wet or dry. It is a fact that all attempts to cultivate the grape in our low damp valleys have utterly failed, the plants invariably being destroyed by mildew on the leaves, while the few vines that grow upon the small farms lying...
